Now in its seventh year, the event aims to send a "positive wave of energy" around the world and draw attention to the benefits of this ancient Chinese form of exercise which is steadily establishing itself in the West. The early morning practice of tai chi, which can be seen in city parks throughout China, is now an increasingly common sight in Europe and America, too, where it is hailed as the new yoga. Its benefits have been validated by recent studies indicating					

Digital Date	Print Date	URL	Headline	Article	that regular practice contributes to better balance, flexibility and mobility, can reduce cardiovascular stress, and can help with symptoms of arthritis and multiple sclerosis. Tai chi could well join a growing list of "alternative" therapies invoked by Western health authorities to counter the stress and strain of modern living. Tai chi was originally developed as a discipline for Taoist monks and hermits who fled the restlessness of the cities to find quiet in remote and mountainous regions. Those places had their dangers, from poor climatic conditions to wild animals, bandits and other aggressors. How was the poor hermit to protect himself against all those threats? The answer, supposedly devised by a 12th-century monk of the Wu Tang monastery, Zhang Sanfeng, was a progressive series of exercises, based on Taoist observation of nature, which would become known later as tai chi chuan, meaning "supreme ultimate fist." The name reveals it to be a combative art, but much practice and guidance with a master are required to be able to draw on tai chi in a situation of real conflict. Many will not get past first principles, but as the first stage is to make yourself mentally and physically fit and healthy, that is already well worth attaining. At first sight, its gentle circular movements reveal little of the martial aspect of tai chi. The slow, dance-like form, with a powerful hint of energy coming from an inner center, has something mysteriously attractive about it. As shown by Western TV and film cult figures like the Karate Kids Mr. Miyagi, or David Carradine's Caine, the underlying philosophy is not one of aggression but of heart, mind and body operating together using a universal source of energy, known as ch'i. From this surrounding field or source, energy is said	Registration Effective Date	Registration Number	Secondary Registration Effective Date	Secondary Registration Numbers	Tertiary Registration Numbers

				<p>to be "gathered" and stored in such a way as to let it flow through the body and create balance and harmony. If this sounds vague and undefinable, that is exactly what it may seem like to a Western mind. Nonetheless, 3,000 years' tradition of using the same principles in traditional Chinese healing adds up to a lot of acquired and precise knowledge. For me, a crucial aspect of this ancient wisdom lies in its closely associated healing and martial skills, both requiring an intimate knowledge of the human body, its strengths and weaknesses. The link between the health side and tai chi is played out in a series of related tuning-up exercises known as qigong (or ch'i kung) which are designed to clear the meridians, or energy channels, through the body. Organic health problems are seen as related to blockages in these channels, and it is important to keep energy flows clear, especially with advancing age. For this reason, and given the gentle and unpressured style of the movements, tai chi is often recommended for older people. Perhaps the crowning achievement of tai chi, in the words of the writer Cheng Tin Hung, is that it can change one's disposition: "After practising over a period of time, a hot-tempered man will change into a gentle man." One of my tai chi teachers put it another way. "It brings out the beauty in a person," he said. "With time, you see the change in someone's face." Just as Communism drove Tibetan Buddhism to the West at a critical time in modern culture, numerous Taoist masters have turned westward and brought an extraordinary tradition of knowledge with them, including tai chi. This is an art that needs no special place, fancy equipment or expensive outlay, and its regular practice can build up grace, beauty and strength in a remarkable way,</p>

2006-06-21	2006-06-21	https://www.nytimes.com/2006/06/21/opinion/21iht-edmoore.2022238.html	Midsummer magic, sun and fire - Editorials & Commentary - International Herald Tribune	False	<p>widely celebrated from Scandinavia to Southern Spain, from Russia to Ireland, and even in China. In this midsummer week, pagans, Christians and unbelievers alike will gather for fire ceremonies that have their origins in rites associated with the sun. Communities and families will light bonfires and dance around them, young lovers leap over the flames together or toss flowers across the fire, flaming brands will be carried around the fields. On the evening of June 23, St. John's Eve, Germans will go out to light their Johannisfeuer, Scandinavians their midsommar fire, the Irish to celebrate their Bonfire Night. Crowds in Alicante and Valencia will celebrate the Fires of St. John, the touristic version of customs once condemned by the Church as superstitious and a danger to public morals. For many, this will just seem an opportunity for drinking all night and doing reckless things with fires and burning torches. In the northernmost latitudes, above all, people around their fires will be celebrating the midnight sun, with dusk and dawn conjoining on the northern horizon. A significant celestial event lies behind all these fire festivities, of course - the summer solstice, when the sun is highest above the northern hemisphere and gives us the longest day of the year. On or around June 21, the sun "stands still" - the sense of the word "solstice" - before the orbit of the earth starts to lower its angle again, making the days shorter and colder. So we are at a turning point in the year when a return to darkness already beckons. For the Chinese, this is the "yin" moment of the year, when Li, the element of fire, is invoked. In primitive terms, our sun is threatened. The custom of the Midsummer Fire is our instinctive response. As one writer on Celtic tradition puts it, the lighting of fires is "sympathetic</p>	2007-01-09	TX 6-505139	2009-08-06	TX 6-684-037	

Digital Date	Print Date	URL	Headline	Article	Trappings of the modern world we still have strong instincts toward the sun, the Moon and the natural cycles and rhythms of the year. The Austrian thinker Rudolf Steiner argued we should acknowledge their profound effects, celebrate them and allow them to work upon us. From this viewpoint, sun worship may even be good for our health.
